

Relationship Manager Roles and Responsibilities

1. Purpose

This document defines the responsibilities of the Relationship Manager role throughout the onboarding lifecycle.

2. Case Accountability

The Relationship Manager is the accountable owner for every onboarding case raised for their assigned clients, from Intake through to ReadyToTrade.

3. Desk and Region Alignment

Relationship Managers are aligned to a desk (Commodities or Global Markets) and a region. Cases are routed to the Relationship Manager covering the client's primary desk and region.

4. Client Communication

The Relationship Manager is the single point of contact for the client during onboarding and is responsible for communicating outstanding document requests.

5. Escalation Duty

Where a case risks missing its TargetGoLiveDate, the Relationship Manager must escalate to their desk head and document the reason for delay on the case.
