

Document Collection and Validation Checklist

1. Purpose

This checklist defines the minimum documents required before an onboarding case can move from DocumentCollection to the Decision stage.

2. Individual Customers

Individual customers must provide a government-issued photo identification document and proof of address dated within the last three months.

3. Business Customers

Business customers must provide a certificate of incorporation, a register of directors and shareholders, and identification for each Ultimate Beneficial Owner.

4. Government Customers

Government entity customers must provide an authorising mandate confirming the signatory's authority to enter into trading arrangements on behalf of the entity.

5. Ask Only for What Is Missing

The onboarding agent must check pre-populated case data before requesting any document from the client, and must only request items that cannot already be confirmed from the firm's existing records.
