

Onboarding Case Stage Definitions

1. Purpose

This document defines the five stages an onboarding case moves through and the exit criteria for each stage.

2. Intake

Intake begins when a Relationship Manager raises the case. Exit criteria: legal entity confirmed, affiliate structure mapped, initial risk indicators captured.

3. Screening

Screening covers sanctions, PEP, adverse media and financial review. Exit criteria: all screening results recorded and a preliminary risk rating assigned.

4. DocumentCollection

DocumentCollection covers requesting, validating and deduplicating supporting documents. Exit criteria: all checklist documents received and validated.

5. Decision and Setup

Decision covers the KYC approval determination. Setup covers account creation in Dynamics 365 and Dataverse. Exit criteria for Setup: all required accounts created and the case marked ReadyToTrade.
