

Web IQ External Screening Data Sources

1. Purpose

Web IQ brings fresh external intelligence into the onboarding case: company registries, ultimate beneficial ownership, sanctions and PEP lists, adverse media and corporate filings.

2. Registry Verification

Company registry lookups confirm the legal entity is active, in good standing and that the registered officers match the names supplied during intake.

3. Ultimate Beneficial Ownership

Any individual or entity holding 25% or more of the client, directly or indirectly, must be identified as an Ultimate Beneficial Owner and screened individually.

4. Refresh Frequency

External screening data is refreshed at case open, prior to the KYC decision, and on every periodic review cycle thereafter. Cached results older than 30 days are not used for a decision.

5. Source Attribution

Every fact pulled from an external source is stored with the source name and retrieval timestamp so it can be cited in the KYC decision record.
