

Ready-to-Trade Certification Criteria

1. Purpose

This document defines the criteria that must all be satisfied before an onboarding case can be certified ReadyToTrade.

2. KYC Decision

The KYCAssessment ApprovalStatus for the case must be Approved by an authorised reviewer, with no unresolved sanctions or PEP Hit.

3. Document Completion

Every document on the applicable checklist must be received, validated and not expired.

4. Account Provisioning

At least one CustomerAccount and one TradingAccount must be created and linked to the case, with the TradingAccount status set to Active.

5. Final Sign-Off

The Relationship Manager records the ReadyToTradeDate on the case only after confirming all preceding criteria are met, at which point Microsoft 365 Copilot surfaces the case as ready to trade to the RM and Ops teams.
